VOLUME CONTENTS

Number 1

S. Savithri and T. K. Varadan	1	Large deflection analysis of laminated composite plates
G. Zboiński	13	The incremental variational principle and finite element displacement approximation for the frictional contact problem of linear elasticity
T. H. Young and F. Y. Chen	29	Post-flutter analysis of beams subjected to sub-tangential forces
L. Tao and K. R. Rajagopal	43	Unsteady diffusion of fluids through a non-linearly elastic cylindrical annulus
Fuling Dai and K. R. Rajagopal	57	Proportional shearing of a non-linear visco-elastic layer
G. Iosilevskii and H. Brenner	69	Taylor dispersion in systems containing a continuous distribution of reactive species
P. M. Beckett	87	Singular asymptotic expansions for non-linear oscillator equations
Dong Ku Shin, O. H. Griffin Jr and Z. Gürdal	95	Postbuckling response of laminated plates under uniaxial compression
A. Novotný and M. Padula	117	On the stability of the rest state of compressible multipolar fluids

Number 2

C. E. Maneschy, M. Massoudi and A. Ghoneimy	131	Heat transfer analysis of a non-Newtonian fluid past a porous plate
P. K. Koliopulos and R. S. Langley	145	Improved stability analysis of the response of a Duffing oscillator under filtered white noise
J. P. Pascal and H. Pascal	157	Similarity solutions to some gravity flows of non-Newtonian fluids through a porous medium
L. Y. Bahar	169	On a non-holonomic problem proposed by Greenwood
R. M. Gundersen	187	The evolution of packets of surface waves
G. Romano, L. Rosati and F. Marotti de Sciarra	195	Variational formulations of non-linear and non-smooth structural problems

W. Pietraszkiewicz	209	Explicit Lagrangian incremental and buckling equations for the non-linear theory of thin shells
F. Baldoni, R. Gudhe and K. K. Yeleswarapu	221	Helical flow of a simple fluid between eccentric cylinders
G. M. Moremedi, D. P. Mason and V. M. Gorringe	237	On the limit cycle of a generalized van der Pol equation
M. H. Sadd, QiMing Tai and A. Shukla	251	Contact law effects on wave propagation in particulate materials using distinct element modeling
N. K. Kucher and M. V. Borodii	267	A version of endochronic theory of plasticity for describing non-proportional cyclic deformation
	279	Announcement
	I	Software Survey Section

Number 3

A. A. Zevin	281	Qualitative analysis of periodic oscillations in classical autonomous Hamiltonian systems
A. Tylikowski	291	Dynamic stability of non-linear antisymmetrically laminated angle-ply plates
A. Paglietti	301	Macroscopic determination of the distortion energy due to microscopic defects
Y. M. Fu and C. Y. Chia	313	Non-linear vibration and postbuckling of generally laminated circular cylindrical thick shells with non-uniform boundary conditions
H. A. Koenig and N. A. Bolle	329	Non-linear formulation for elastic rods in three-space
O. M. O'Reilly	337	Global bifurcations in the forced vibration of a damped string
Liu Ren-Huai and Zou Ren-po	353	Non-linear bending of a corrugated annular plate with a plane boundary region and a non-deformable rigid body at the center under compound load

Number 4

H. Ohnabe and F. Mizuguchi	365	Large deflections of heated non-homogeneous circular plates with radially varying rigidity
C. G. Speziale and R. Abid	373	Reynolds stress calculations of homogeneous turbulent shear flow with bounded energy states

A. H. Kara and F. M. Mahomed	379	A note on the solutions of the Emden–Fowler equation
P. Tuğcu	385	Material non-linearity and critical strains in rate-independent plasticity
M. P. Mignolet and Guangwuu W. Fan	393	Non-stationary response of some first-order non-linear systems associated with the seismic sliding of rigid structures
G. J. M. Marée	409	Sudden change in a second-order non-linear system with a slowly varying parameter
B. Ravindra and A. K. Mallik	427	Hard Duffing-type vibration isolator with combined Coulomb and viscous damping
K. Hackl, C. Y. Yang and A. H.-D. Cheng	441	Stability, bifurcation and chaos of non-linear structures with control—I. Autonomous case
A. Ramachandra Rao and K. Padmavathi	455	Pulsatile flow of a viscous fluid in elliptical pipe of variable cross-section
O. Kolditz and H.-J. Diersch	467	Quasi-steady-state strategy for numerical simulation of geothermal circulation in hot dry rock fractures
V. I. Erofeyev and A. I. Potapov	483	Longitudinal strain waves in non-linearly-elastic media with couple stresses

Number 5

B. S. Dandapat and P. C. Ray	489	Flow of a thin liquid film over a cold/hot rotating disk
H. Bellout and F. Bloom	503	Steady plane Poiseuille flows of incompressible multipolar fluids
M. Vasudevaiah and R. Patturaj	519	Slow viscous rotation of two nearly spherical solids of revolution
C. E. Maneschy, M. Massoudi and V. R. Velloso	531	Dynamic elastic solutions in neo-Hookean and Mooney–Rivlin materials
R. C. Yalamanchili	535	Flow of non-Newtonian fluids in corrugated channels
A. H.-D. Cheng, C. Y. Yang, K. Hackl and M. J. Chajes	549	Stability, bifurcation and chaos of non-linear structures with control—II. Non-autonomous case
B. Das and R. L. Batra	567	Secondary flow of a Casson fluid in a slightly curved tube
B. K. Lee, J. F. Wilson and S. J. Oh	579	Elastica of cantilevered beams with variable cross sections

M. Chiba 591 Non-linear hydroelastic vibration of a cantilever cylindrical tank—I. Experiment (empty case)

M. Chiba 601 Non-linear hydroelastic vibration of a cantilever cylindrical tank—II. Experiment (liquid-filled case)

Number 6

R. M. Gundersen 613 Non-linear wave interactions

R. Cortell 623 Numerical solutions for the flow of a fluid of grade three past an infinite porous plate

K. T. Joseph and P. L. Sachdev 627 Exact analysis of Burgers equation on semiline with flux condition at the origin

J. P. Pascal and H. Pascal 641 On some diffusive waves in non-linear heat conduction

J. Levitas and T. Weller 651 Dynamic global postbuckling behavior of beams by cell-to-cell mapping

J. E. Peters 663 Applications of the group of equations of motion of a polytropic gas

G. Domokos and P. Holmes 677 On non-inflectional solutions of non-uniform elasticae

Zhiyun Xie and N. Chandra 687 Application of equation regulation method to the solution of inverse problems in multiphase materials

P. G. L. Leach, S. Bouquet and A. Dewisme 705 Symmetries of Hamiltonian one-dimensional systems

R. J. Tait and J. L. Zhong 713 Perturbation methods for the impact problem of a non-linear elastic string

G. Valenti 731 On a model for a non-Newtonian fluid with cylindrical symmetry: wave features and similarity solutions

C. J. Younis and D. E. Panayotounakos 737 Elastica of an axially loaded column/footing system resting on elastic base

I Volume Contents and Author Index for Vol. 28 (1993)
